There are features to save lot of time like using templates for posting jobs, using AI tools to scane the resume and find out the matching profiles, use AI Filters based on the company preferences, use Manual task automation tool, etc.

Responsibilities

Responsibilities: Sr. Backend Engineer for Automated Task Management Service using Laravel + Mysql + Other Devops

EDUCATIONAL

Masters in Computer Science

2012-2014

Punjab Technical University (M.S.C. C.S.)

Bachelors in Computer Science

2009-2012

Punjab Technical University (B.S.C. C.S.)

In addition to the core curriculum, I pursued hands-on projects and specialized coursework to deepen my expertise. I worked on real-world applications involving e-commerce logistics, system integration, and cloud-based deployment. I also explored AI/ML, data analytics, and web application development, and completed a capstone project focused on end-to-end automation of business workflows. These experiences equipped me with both strong theoretical foundations and practical problem-solving skills relevant to real business challenges.
